# QUALITY

Waguruwel Oil Mills, we improve our product quality through implementing and establishing systematic quality assurance and continual improvement program which strengthen by novel technologies, modern machineries and skill full well train dedicated staff with the support of well committed management. Continues monitoring process allows hundred percent process control. We assure our product quality with best international standard including BRC Food (British Retail Consortium), FSSC 22000, ISO 22000:2005, Organic certification (EU, USDA, FIFA and JAS), KOSHER and HALAL. We have certified under ISO 22000 management system since 2015 and FSSC 22000 food safety system certification since 2016. The British Retail Consortium (BRC) one of the most recognized Global Standard for Food Safety and quality which is benchmarked GFSI standard, Waguruwela Oil Mills have acquired its BRC certificate since 2016. Nevertheless, we acquired KOSHER, HALAL and US FDA registration.

Waguruwela Oil Mills engaged in organic farming and production since last decade, we have proven organic farming and production with well recognized organic standards such as JAS (Japanese Agricultural Standards), FIPA (Organic Korea), Organic EU and USDA-NOP.

In the year 2015 Waguruwela Oil Mills strengthen its internal laboratory facility with modern machineries, since we are conducting a number of physical, chemical and microbiological testing, including free fatty acid value (FFA), peroxide value (PV), moisture and volatile matters content, Fat content, Acidic value, Total plate count (TPC/APC), E. Coil count, Coliform count, Yeast and Mold count and many more. Rather than checking internally we have conducted periodic proficiency test with local and international laboratories such as GALAB, PICA, SGS and Bureau Veritas to ensure process and final product quality.

We are improving our quality assurance process by continuous monitoring, regular training, periodic internal and external auditing and evaluating customer feedback.
